WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

United States Agriculture Data, 1840 - 2010

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

1920 County and State, Dataset 1

STATE: ICPSR state code

Based upon 3,127 valid cases out of 3,127 total cases.

- Mean: 41.07
- Median: 43.00
- Mode: 49.00
- Minimum: 1.00
- Maximum: 100.00
- Standard Deviation: 15.95

Location: 1-3 (width: 3; decimal: 0)

Variable Type: numeric

COUNTY: ICPSR county code

Based upon 3,127 valid cases out of 3,127 total cases.

- Mean: 985.42
- Minimum: 0.00
- Maximum: 8400.00
- Standard Deviation: 985.92

Location: 4-7 (width: 4; decimal: 0)

Variable Type: numeric

NAME: Name of state/county

Based upon 3,127 valid cases out of 3,127 total cases.

Location: 8-29 (width: 22; decimal: 0)

Variable Type: character

TOTPOP: Total population, 1920

Based upon 3,126 valid cases out of 3,127 total cases.

- Mean: 101648.66
